

RunMyProcess Upgrade Makes it Easier and Faster to Integrate Enterprise Systems

Posted on 12th December 2018

[Save for later](#)

Munich, December 12, 2018 – Fujitsu today announces a major upgrade for RunMyProcess, its well-proven workflow automation and web process integration platform. The upgrade includes not only an improved user interface, but also the introduction of important productivity components, such as fully integrated online help function and vastly improved mass data handling.
