Problem solved:
Cloud Workflow

RunMyProcess.
a Fujitsu company
Cloud Workflow.

Improve business operations using workflows developed and deployed in the cloud.

To guarantee quality, ensure consistency and maximize efficiency every business needs to document, control and manage its workflows – but traditional on-premise technologies for BPM and workflow management have always been expensive to buy, slow to deploy and IT intensive to operate and manage.
Cloud Workflow.

The problem

In today’s increasingly digital world, businesses can leverage an ever expanding pool of people and systems to streamline their workflows and transform the way their business operates.

But many organizations continue to rely on workflow technology from a previous era, where complex and expensive on-premise BPM and workflow products were used to deliver high-cost internal process improvements. While such initiatives helped bring control to large-scale back office activities, they fail to provide the fast, lightweight delivery and integration capabilities needed to support dynamic digital workflows in every area of the business.

Without the ability to easily and quickly deploy workflows across the entire organization, however, we cannot digitize our operations and ensure that every area of the business benefits from the speed, control and quality improvements that workflow technology provides.

The solution

RunMyProcess overcomes these problems by giving you a fast, low cost workflow platform delivered in the cloud, making it easy to quickly deliver efficient and flexible workflows for every part of the business.

By using our sophisticated workflow and integration capabilities, you can quickly deliver flexible, mobile-ready workflows for every area of the business including e.g. sales, marketing, finance, HR, procurement, supply chain etc.

Even better our standard connectors make it simple to connect your workflows with data from a broad range of systems – including SaaS services like Office 365 or salesforce, on-premise systems like Oracle or SAP or even social services like Facebook or Google+.
Cloud Workflow.

Lightweight, enterprise-scale workflow in the cloud

Sales & Marketing  Production  Procurement  Supply chain  Finance & Legal  Human resources

Cloud powered workflows for the whole enterprise

Integration to line of business systems and data (cloud and on-premise)
In addition our Enterprise Process Store provides a single access point and a consolidated, personalised view of outstanding tasks across all workflows - helping to maximise productivity.

Workflows created using RunMyProcess are automatically available on all devices, opening up business workflows for use beyond the traditional office PC and enabling staff to participate in processes from anywhere.

In addition our Enterprise Process Store provides a single access point and a consolidated, personalised view of outstanding tasks across all workflows - helping to maximise productivity.

Unify the digital experience
RunMyProcess provides a scalable, easy to use workflow engine backed by an extensive library of integration connectors for business productivity tools like Office 365 and Google Apps - making it simple to integrate e.g. email, calendars and docs.

RunMyProcess also goes far beyond this, however, offering an extensive library of connectors for many other cloud, social and on-premise systems and devices.
Cloud Workflow.

Create new workflows using a powerful drag-and-drop environment

RunMyProcess enables you to quickly develop workflow-driven applications in the cloud, providing drag-and-drop development, easy deployment and worry-free operations.

By integrating all of the IT and operational capabilities needed to build, run and deploy workflows in the cloud we remove the technical and financial barriers to automating a wide range of business tasks across the organization.

Deliver at digital speed and scale
RunMyProcess offers an additional environment that makes it easy for business users to prototype workflows themselves, significantly reducing the timescales and costs of testing alternatives and agreeing specifications.

By empowering business colleagues to set up and test the workflows they need - with or without IT support - RunMyProcess enables IT to focus on approval, integration and roll out.
At RunMyProcess we love to solve digital problems. Small ones, big ones – we honestly don’t mind.

We believe that digital connections between people, software and devices can lead to wonderful new ideas – and open up new ways of looking at previously intractable business and social problems.

That’s why we’re passionate about solving digital problems and helping enterprises evolve using the power of connected technology. We want to help our customers make the world a better place, one rapid solution at a time.

To achieve this we operate a cloud platform for quickly and securely building applications that connect enterprise systems and processes to the people, clouds and devices of the digital world. By making connections our platform helps enterprises safely evolve towards new digital business models that make a real difference to the lives of their customers and employees.

Our unique platform enables organizations to:

• Deliver user experiences that seamlessly follow people across devices.
• Capture end-to-end processes that connect people, software and things.
• Accelerate the delivery and evolution of connected business applications.
• Empower business people to innovate at the edge of the organization.
